- **Toothpaste**
- **Red Wine**
- **Grease**
- **Coffee**
- **Deodorant**
- **Makeup**
- **Mud**
- **Fruit Juice**

Tough Stain Advice:

Always pretreat stains immediately when they happen with a cold water and product mix to form a paste which is scrubbed into the stain and allowed to stand for 1 hour. Then soak with sufficient product in very hot water overnight. Wash as normal the next day. Do not tumble dry or iron if the stain is still present. Repeat the above process.
